### A Mitre zipbolt

- Ideal solution for connecting angled joints. For use in furniture and staircase construction
- Allows joining of materials in a range of angles from 80° - 180°
- Hardened tool steel and plastic

#### Order Ziptool separately

**\*Please note:** The distance from the edge of the material to the centre of the Ø 25 mm bore hole (Ø A) is 60/50 mm (B). Depending on the angle the material is cut and the depth of the bore hole, this actual distance will vary. The Mitre zipbolt has been designed to be adjusted on the full scope of the threaded shaft. For further adjustment, when drilling the shaft Ø E continue to drill past the 25 mm bore hole. This allows the shaft to travel further past the gear head when tensioning the Mitre zipbolt
