

Compair® Flow Ventilation System Ducting Tubes and Connectors

Compair® flow systems have a flat duct profile with soft radii and can be installed in wall-mounted cabinets or in the often limited space between the wall-mounted cabinet and the room ceiling.

- System construction height of only 77 or 89 mm (outside height) means Compair® flow complies with all planning requirements
- Plug-in connections with guide chamfers for easy handling provide ideal conditions for secure and quick assembly
